

Building a salary management program for construction company No. 15 Ha Long - Quang Ninh

Nguyen Thi Le Phuong

Abstract: This topic aims to meet the need for optimizing human resource cost management at Construction Company No. 15 Ha Long - Quang Ninh. Through research, solutions are proposed by designing and implementing a salary management software system based on modern principles. The method combines theoretical research with experimentation to ensure the high applicability of the product. It is expected that the system will help the company improve business efficiency while enhancing the quality of life for employees.

Keywords: Salary management, Management software, Construction company
