

Building a fixed asset management program at the Phu Binh District Tax Office, Thai Nguyen Province.

Duong Bich Phuong

Abstract: This topic aims to build a fixed asset management system for the Phu Binh District Tax Department, Thai Nguyen Province. Through theoretical research and practical analysis, the topic will propose solutions to optimize the asset management process, contributing to improving the efficiency of tax management. Using a combined method of document research and information system deployment, the project hopes to achieve the goal of applying new techniques to practice, while improving the quality of administrative services at the Tax Department.

Keywords: Fixed asset management, Tax management information system, Case study, Information technology in management
