

Building a loan application management program for the Bank for Agriculture and Rural Development, Song Cau Thai Nguyen branch.

Tran Thi Vui

Abstract: This topic aims to solve the problem of effectively organizing, managing, and monitoring loan applications at the Bank for Agriculture and Rural Development (NABDNT) - Song Cau branch, Thai Nguyen. Through theoretical and experimental research, the topic builds an information management system to improve the loan processing procedure for customers, reduce credit risks, and enhance the operational efficiency of NABDNT. The expected results contribute to promoting the sustainable development of the local agricultural economy.

Keywords: Loan portfolio management, Agricultural Bank, Information management system, Rural credit, Digital transformation
