

Building an accounting program for sales and accounts receivable for Minh Cau Supermarket, Thai Nguyen City.

Pham Thi Na

Abstract: In the context of increasingly complex financial management, this topic focuses on building an automated system for sales accounting and accounts receivable for Minh Cau supermarket in Thai Nguyen City. The objective of the research is to address the shortcomings in data tracking and management processes, while enhancing accuracy and efficiency in handling financial information. The research methodology includes analyzing the root causes of the problem, designing, and implementing the system based on modern programming technologies. The expected results will make significant contributions to the supermarket's financial management and provide a foundation for further development in this field.
