

Building a savings deposit management program at the Bank for Agriculture and Rural Development, Dinh Tram Industrial Park - Bac Giang Province

Nguyen Duy Thien

Abstract: In the current economic context, the effective management of savings deposits at the Bank for Agriculture and Rural Development (NABCBG) in the Dinh Tram industrial park has become a decisive factor for sustainable development. This study aims to build an intelligent savings deposit management system, meeting the need to optimize workflow and improve service quality. Using a research method combining theory and experimentation, the study will introduce advanced technical solutions and implement applications at NABCBG Dinh Tram. The expected outcome is an efficient savings deposit management system that enhances transparency and improves customer satisfaction.
