

Building a material management program at Thai Nguyen Power Company

Phạm Thị Bảo Yến

Abstract: In the context of material management at electric power companies becoming increasingly complex, this study aims to build an effective management system for Thai Nguyen Power Company. By applying a comprehensive approach, combining theoretical and experimental research, the project seeks to provide solutions to optimize the material management process, thereby enhancing the company's operational performance. The expected results will contribute significantly to improving material management processes in the electric power industry.
