

Building the sales accounting subsystem at SAP Veterinary Trading and Service Company Limited in Thai Nguyen province

Nguyen Thi Chang

Abstract: In the context of increasingly important financial management, this topic aims to research and implement a solution for building a sales accounting subsystem for SAP Veterinary Trading and Service Company Limited in Thai Nguyen province. The objective of the project is to improve the efficiency of financial information management by automating the sales accounting process, ensuring accuracy and timeliness in business reporting. The approach combines theoretical research on accounting systems with experimentation based on the SAP platform. The expected results will bring significant benefits to the company by enhancing work productivity, reducing risks, and strengthening the ability to make effective business decisions.
