

Building a fixed asset accounting program for Thang Long - Hung Yen Packaging Co., Ltd.

Luong Thi Lan

Abstract: In the context of fixed asset management (FAM) being increasingly emphasized to enhance operational efficiency, this thesis aims to study and develop a fixed asset management system for Thang Long - Hung Yen Packaging Company Limited. Through the process of practical analysis at the company, the thesis applies a combination of theoretical research and experimental methods to develop an effective support program for establishing and monitoring the status of fixed assets. The implementation of this system promises to improve asset management capabilities as well as minimize risks, while also contributing to enhancing transparency in the company's business operations.
