

Building a cash collection management program at the State Treasury of Pho Yen District

Nguyen Van Khuong

Abstract: This topic aims to research and build an effective cash collection management system for the State Treasury of Pho Yen district. With the rapid development of information technology, applying technical solutions to revenue management activities is an urgent requirement to improve productivity and minimize errors in the transaction process. Through theoretical research combined with experimentation, the topic proposes a comprehensive solution, from identifying specific requirements to designing and deploying the system. The expected outcome of the topic is to provide a modern management tool, contributing to state administrative reform.
