

Building a fixed asset management program at FAST Enterprise Management Software Joint Stock Company - Cau Giay - Hanoi

Phạm Hồng Nhung

Abstract: This topic is proposed to address the efficiency problem in managing fixed assets (FP) at FAST Enterprise Management Software Joint Stock Company. The practical context shows that current FP management still has limitations in terms of accuracy and efficiency. The objective of the topic is to build an automated FP management system to optimize the management process, ensuring transparency and accuracy of information. Through theoretical research combined with experimentation, the topic will deploy technology applications to support FP management at FAST. The expected results will bring significant efficiency in improving work productivity and minimizing asset management risks.
