

Building the optimal NGN network structure for Phu Tho telecommunications.

Pham Anh Tuan

Abstract: In the context of the rapid development of telecommunications technology, this topic focuses on researching and building an optimal NGN (Next Generation Network) structure for the telecommunications area of Phu Tho province. The goal is to address the technical infrastructure problem to improve the quality of local telecommunications services. The research method applied is based on a combination of theory and experimentation to ensure effectiveness in deployment. Through this, the topic hopes to make important technical and application contributions to the telecommunications industry in Phu Tho.

Keywords: NGN network structure, Phu Tho telecommunications, technical infrastructure
