

Building an Android application for order taking at Thu Mây restaurant.

Nguyen Thi Thuy

Abstract: In the context of the growing food service industry, optimizing the ordering process at restaurants is an urgent need. This topic focuses on the development of a mobile application on the Android platform to serve the ordering needs of customers at Thu Mây restaurant. Through a combination of theoretical research and experimentation, the main objective is to build a user-friendly and efficient interface system to improve the service experience at the restaurant. The expected results will demonstrate improvements in customer service and order management capabilities, while contributing to the field of mobile applications and food services.
