

Building an online TOEIC preparation program

Nguyen Thanh

Abstract: In the context of the increasing demand for English learning among Vietnamese people and the shift towards online learning formats, this topic focuses on building an online TOEIC preparation learning material system. The main objective is to design and implement an interactive learning program with various multimedia exercise types to optimize the review process. The research methodology includes a combination of educational theory and experimentation to evaluate the effectiveness of the learning material system. The expected results will make an important contribution to expanding online educational infrastructure, providing flexible learning solutions for students.
