

Build a website to introduce and sell mobile phones for Quang Minh Mobile Phone Store.

Dam Thanh Tuan

Abstract: In the context of an increasing number of people using mobile devices to access information and shop online, this project aims to build a professional web system to promote and increase sales for Quang Minh Mobile Phone Store. To achieve this goal, the research will approach both the theoretical aspects of website design and the practical implementation of the application. It is expected that building the web system will create significant improvements in the store's business operations, better meet customer needs, and enhance competitiveness in the market.

Keywords: Mobile phone website, online sales, website design, sales management, mobile phone store.
