

Building a website for searching locations in Thai Nguyen province

Nguyen Thi Tuyet Nhung

Abstract: This topic aims to research and develop a web system to support locals and tourists in easily finding information about tourist attractions, dining services, and shopping locations in Thai Nguyen province. During implementation, the topic applies a combined approach of theory and experimentation to ensure the accuracy and efficiency of the system. The expected results will provide a useful solution for the local tourism industry, contributing to promoting socio-economic development in the province.

Keywords: Search website, Thai Nguyen Tourism, Web technology, Application development, Local economy
