

Building online reports for the Tan Thinh - Thai Nguyen Gas management software.

Dao Dang Son

Abstract: This topic focuses on building an online reporting system to effectively support the gas sales management process of Tan Thinh Gas One Member Limited Liability Company in Thai Nguyen. The research context is based on practical needs, aiming to optimize work processes and improve the quality of services provided to customers. The approach includes studying theories on modern gas sales management combined with implementing experimental applications to build the online reporting system. The expected results will bring significant value in improving work performance and providing timely information to relevant departments.
