

Building an online mobile phone sales website for Sky Shop-Bac Giang.

Vu Van Trinh

Abstract: The topic aims to meet the online business development needs of Sky Shop store in Bac Giang. The goal is to build an effective mobile phone sales website, providing detailed product information and convenience for customers. The research methods include market analysis, user interface design, and implementation of an online ordering system. The expected results will bring a new business solution and boost sales for Sky Shop.
