

Building café-Karaoke management software integrated on mobile devices for Hoang Minh restaurant - Thai Nguyen

Duong Nghia Duy

Abstract: In the context of the strong development of information technology, the application of digital solutions to the café and karaoke service business sector is an inevitable need. This topic focuses on building an integrated café-karaoke management software on mobile devices to enhance management efficiency, serve customers, and improve the system usage experience for employees of Hoang Minh-Thai Nguyen restaurant. The research methods applied include both theoretical aspects of software design and experimental deployment of the application on mobile devices. It is expected that the system will bring significant economic benefits by optimizing work processes and enhancing customer experience.
