

# **Building a project management website for EXP Thai Nguyen company.**

**Hoang Van Hieu**

**Abstract:** In the increasingly developing context of digitalization and automation trends in business management, this topic focuses on building a web system aimed at optimizing the project management process at EXP Thai Nguyen Company. Through studying the current status and identifying specific requirements, the applied approach is a combination of information technology theory and practical application deployment. The topic is expected to provide an effective solution for comprehensively monitoring, evaluating, and managing projects, thereby contributing to enhancing the competitiveness of EXP Thai Nguyen Company in the market.

**Keywords:** Project management website, Information technology, EXP Thai Nguyen Company, Management automation, Digital technology
