

Building an e-commerce website for The Gioi Di Dong company.

Nguyen Thanh Tuan

Abstract: In the era of rapid digitalization, building a professional e-commerce website system is an urgent need for The Gioi Di Dong Company to optimize business operations and provide services to customers. The topic focuses on designing, deploying, and testing an e-commerce solution that meets requirements for a user-friendly interface, high information security, and effective integration with the inventory management system. Through a combination of theoretical research and experimentation, the topic aims to contribute to enhancing the competitiveness of The Gioi Di Dong Company in the digital market.
