

Building an online English test website for elementary school students.

Bui Thi Oanh

Abstract: In the context of education increasingly focusing on developing students' language skills, this topic focuses on building an online English test website system specifically for elementary school students. The goal is to create an effective and engaging learning environment to enhance children's interest and ability to use English at this age. The research methodology includes synthesizing information from relevant sources, designing a user interface friendly to elementary school students, and implementing practical applications to collect feedback from learners and instructors. The expected result is a highly interactive, easy-to-use website system that aligns with the educational objectives of the English curriculum for elementary school students, while contributing to the development of digital solutions in the field of education.

Keywords: Online English test website, primary education, user interface
