

SketchUp application simulating Tuoi Tho Kindergarten - Thai Nguyen City

Dang Quang Tai

Abstract: In the context of the increasing demand for improving the quality of early childhood education, this topic aims to use SketchUp to simulate the facilities of Tuoi Tho Kindergarten in Thai Nguyen City. Through theoretical research and experimental implementation of SketchUp applications, the topic hopes to contribute to improving the design process and construction project management. The results of the topic not only enhance the work efficiency of the teaching staff but also create practical solutions for kindergartens in optimizing the functionality of space usage.

Keywords: SketchUp, simulation, Kindergarten, Thai Nguyen City, project management
