

Build a drug management program using VB.net language and DevExpress

Nguyen Khac Chien

Abstract: In the context of drug management increasingly demanding efficiency and accuracy, this topic focuses on building a drug management system using the Visual Basic .NET programming language along with the DevExpress library. The project aims to develop a solution that simplifies the drug management process in healthcare facilities, ensuring safety and effectiveness in medication use. The research methodology includes requirements analysis, system design, and application deployment. The expected results will significantly contribute to improving the drug management process, thereby supporting more effective treatment.

Keywords: Drug management, Visual Basic .NET, DevExpress, Medical facility, Drug safety
