

Research on Google Maps navigation system, applying to build a navigation system for businesses.

Ngo Thi Yen

Abstract: This topic focuses on researching and developing a navigation system based on Google Map to meet the needs of businesses in locating places for their operations. In the context of increasing use of technology to optimize work processes, building an accurate and efficient navigation system is necessary. The objective of this topic is to design and implement this navigation system through a combination of research theory and practical experimentation. The expected results will contribute to improving service quality and enhancing productivity for businesses, while affirming the applicability of Google Map in commercial navigation systems.
