

Building an online business website for Dai Tu - Thai Nguyen telecommunications

Ta Thi Phuong Hue

Abstract: This topic focuses on building an online business website system to serve the e-commerce needs of the telecommunications industry in the Dai Tu - Thai Nguyen area. This is a very necessary issue to optimize the transaction process and improve management efficiency in this field. The objective of the research is to design, deploy, and operate an e-commerce website suitable for practical needs. Through a research method based on a combination of theory and experimentation, the topic aims to make a significant contribution to the development of the telecommunications industry in the current digital context, while providing a practical solution to help businesses enhance competitiveness and achieve sustainable development.
