

Build an online ticket sales website for Megastar cinema.

Do Thi Hong Diep

Abstract: This topic focuses on building an online ticket sales website system to serve the shopping needs of customers at Megastar cinemas. The research context is based on the rapid development of e-commerce and the digital transformation trend in the entertainment industry. The objective is to design and implement a user-friendly interface, improve ticket management efficiency, and enhance customer experience. The approach combines theoretical research on website design with experimentation through web application development. The expected results contribute to the advancement of information technology in the entertainment field and provide a specific application solution for Megastar cinemas.

Keywords: Online ticket sales website, Movie theater, E-commerce
