

Building the cash accounting subsystem for Hai Duong Provincial Social Insurance.

Duong Thi Thu

Abstract: This topic focuses on building a cash accounting subsystem for the Social Insurance Management System of Hai Duong Province, aiming to ensure accuracy and efficiency in tracking, recording, and reporting economic activities related to cash. Through the research and implementation process, the topic is expected to combine theoretical methodology with experimentation to build a system that meets the organization's requirements. The expected research results will improve work performance and enhance the quality of reporting information, contributing to the comprehensive development of the Social Insurance Management System of Hai Duong Province.

Keywords: Cash accounting, Social insurance, Hai Duong province, Management system, Accounting subsystem
