

Internet Banking and building a payment processing program at An Binh Commercial Joint Stock Bank, Thai Nguyen

Bui Le Ha Ninh

Abstract: This study aims to meet the growing demand for Internet Banking services in the banking system, particularly at An Binh Commercial Joint Stock Bank, Thái Nguyên. The main objective of the topic is to develop an efficient and secure payment processing program. Through a combination of theoretical research and experimentation, the topic identifies technical requirements and deploys a system suitable for the specific needs of the bank. The expected results of this study not only contribute to improving service quality but also promote technological development in the banking industry.

Keywords: Internet Banking, An Binh Commercial Joint Stock Bank, Business Processing Program
