

Building a video conference call in a local area network (LAN)

Do The Hien

Abstract: This topic focuses on building a video conferencing system within a local area network (LAN) to meet the demand for efficient and cost-effective communication. By applying modern technological principles, the topic studies methods for designing and deploying this system, while also experimenting with specific scenarios. The expected result is to provide a practical application solution for businesses and organizations, contributing to improved work performance by optimizing communication among members within the local network.

Keywords: video conferencing, local area network (LAN), system design, modern technology, enterprise
